

# Linga Energy Solutions

Integrated Renewable Energy Advisory Service

Engineering Intelligence for Clean Energy

## Why choose us?

- End-to-End Expertise across Wind, Solar & BESS
- Strong Capability in Hybrid & RTC Energy Modelling
- IEC-Compliant Engineering & Bankable Assessments
- Advanced Analytics: SCADA, Uncertainty & Simulation
- Proven Approach to Risk Mitigation & Yield Optimization
- Expertise in Repowering & Life Extension Strategies
- Customized Solutions for IPPs, Developers & Investors
- Global engineering standards meet localized project excellence.

## About us

LE Solutions is a specialized renewable energy consulting firm providing end-to-end technical advisory across Wind, Solar, and Energy Storage domains.

We focus on delivering bankable project outcomes, optimized system performance, and long-term asset value creation. Our expertise spans the entire project lifecycle—from Resource assessment and micro-siting to energy yield assessment and operational performance analytics.

"Our engineering approach combines advanced simulation tools, SCADA analytics, and uncertainty modelling to minimize risks and maximize returns for our clients."

We apply globally recognized standards such as IEC compliance, FGW and World Bank environmental guidelines. With strong capabilities in Wind + Solar + BESS integration and RTC (Round-the-Clock) modelling, we support developers in building dispatchable and reliable renewable systems.

## Our Core Expertise

LE Solutions delivers data-driven advisory and engineering solutions across wind, solar, and energy storage.

### Wind Energy Advisory

Resource Assessment, Micro-siting, Yield Assessment, Repowering.

### Solar Energy Advisory

PV Optimization, Yield Simulation, Performance Optimization.

### Energy Storage & BESS

BESS sizing, Hybrid integration, Technology advisory.

## Our services

LE Solutions is a specialized renewable energy consulting firm delivering end-to-end technical advisory across Wind, Solar, and Energy Storage domains. Our services are designed to ensure bankable projects, optimized performance, and long-term asset value creation.

- ✔ Wind Energy Consulting
- ✔ Solar PV Advisory
- ✔ Energy Storage & BESS
- ✔ Hybrid & RTC Solutions
- ✔ Repowering & Life Extension
- ✔ Customized Training support
